# Guitar Playing Made Easy For Everyone

## BOOK 3

By

Joseph M. Estella and Geo. Roberts

### Foreword

Book Three is a continuation of the smooth step by step logical advancement which characterized the early elementary stages in Books One and Two of this course.

The melodic material affords a big variety of well known songs. These are arranged to be played as solos — vocal accompaniments — or instrumental duets.

The chord names are also included. These may be used by any other chording instrument such as the ukulele, banjo etc., or by the guitarist in either a simplified or advanced form, depending on the students technical proficiency.

As the book progresses, the solo part is advanced to three and four string melody chords, while the accompaniment part, employs some interesting alternating and bass run style playing.

The arrangements are suitable to group or recital playing, string and accordion bands.

# Introducing The Dotted Quarter Note

A dot placed after a note increases the value of the note by one half.

Example:

$\text{♩} = 1$  count

$\text{♩} \cdot = 1\frac{1}{2}$  count

Count 1 2 + 3 4      1 2 + 3 4      1 2 + 3 4

A quarter note plus an eighth note ( $\text{♩} + \text{♩}$ ) also =  $1\frac{1}{2}$  counts.
